Tempus Overview

- In addition, **Tempus Pro** will have the following features:
 - Faster start time
 - **Tempus Pro** will warm-start in less than 15 seconds
 - Higher alarm volume
 - 360° visible 3-colour alarm bar
 - Recessed tactical switch
 - Event button
 - Previous activity function button
 - Future ability to add other features such as iStat integration and tissue oximetry

Other **Tempus Pro** Features (estimated Q4 2013)

- Additional 2 channels of invasive pressure
- USB 3.5 MHz ultrasound
- USB 7.5 MHz ultrasound
- USB Video laryngoscopy

Upgradable Modularity - Ultrasound

- Ultrasound for FAST exam currently under development
- Small compact Tempus powered ultrasound probe
 - Gives completely new capability from same battery and display you are already carrying
- Structured process to remind user of the elements of the exam
- Automatic creation of a FAST exam report for record of care and **ReachBak**

Upgradable Modularity – Video Laryngoscope

- Integration with video laryngoscope under development
- View vitals including capnography whilst getting video images from laryngoscope
 - Gives completely new capability from same battery and display you are already carrying
- Is particularly useful with difficult intubations especially in transport
