

T24 Biometrics

for Temenos T24 Core Banking Platform

KEY BENEFITS

Enable Growth

- Deploy new products and services
- Support micro-finance initiatives
- Improve customer service

Manage Cost

- Increase operational efficiency
- Decrease time with the teller
- Decrease IT support cost and password management

Control Risk

- Prevent identity fraud
- Identify based on who you are, not something you have or know
- Multi-factor authentication
- Non-repudiation of charge backs
- Separation of duty for IT administrators

PRODUCT DESCRIPTION

Banks are demanding core banking systems that enable growth, manage cost and control risk. Positive identification of employees and customers is a critical requirement for delivering on these success factors. T24 Biometrics provide “one touch” identification of employees and customers for any transaction in the Temenos T24 Core Banking platform. This allows banks to cost-effectively launch new products, serve customers in emerging markets, decrease time with the teller for in-branch operations and meet regulatory compliance guidelines for multi-factor authentication.

T24 Biometrics provides banks with strong, usable security that natively integrates with your T24 system. Built on an enterprise framework, T24 Biometrics offers a platform for future expansion of biometric identity management within the bank, including single sign-on. It can work with ATM and point of sale devices. The enterprise framework allows a single fingerprint enrollment to be shared across multiple functional areas.

T24 Biometrics enables:

- One touch login to T24 core banking
- Authentication of any transaction override, including cash withdrawal, funds transfer and multi-tenant accounts
- Customer authentication at the bank branch
- Mobile banking

ABOUT CROSSMATCH™

Crossmatch helps organizations solve their identity management challenges through biometrics. Our enrollment and authentication solutions are trusted to create, validate and manage identities for a wide range of government, law enforcement, financial institution, retail and commercial applications. Our solutions are designed using proven biometric technologies, flexible enrollment and strong multi-factor authentication software, and deep industry expertise. We offer an experienced professional services capability to assess, design, implement and optimize our identity management solutions for a customer's individual challenges. Our products and solutions are utilized by over 200 million people in more than 80 countries.

T24 BIOMETRICS INCLUDES:

T24 Login

One touch login to T24 using only a fingerprint or a combination of fingerprint and password.

- Enable separation of duty for IT administrators
- Meet multi-factor authentication compliance regulations
- Eliminate IT support costs for password administration

T24 Transaction Authentication

One touch management approval of transactions in the T24 core banking system

- Verify any transaction override in T24
- Decrease complex transaction processing time by 50%
- Improve customer service
- Reduce time with the teller
- Non-repudiation of transactions

T24 Customer Branch Authentication

One touch authentication of customers who visit the bank branch to conduct transactions

- Support micro-finance expansion initiatives by enabling cost-effective customer identification
- Authenticate customers without credentials

Management Console

Streamline enterprise-wide deployments, ongoing management and ISO compliance of biometrics

- Synchronize user identities with T24 and Microsoft Active Directory
- Configure biometric parameters for enrollment, authentication and system access privileges
- Capture enrollments through either a supervised or self-enrollment process
- Maintain one central enrollment repository
- Report on system access and usage

Consulting Services

Before implementation, understand, assess, define your needs and requirements

- Team of experts in biometrics and security
- Define policies
- Provide custom remediation path
- Assess after deployment

Deployment Services

Implement T24 Biometrics with a flexible, incremental approach. Enable “go live” within a matter of weeks.

- Delivered on a pre-configured appliance server
- On-site installation, configuration and training
- Incremental rollout to specific user groups
